

Asset Tracking Solution

LXE / REDBEAM *Fixed asset tracking made easy!*

RedBeam & Honeywell make fixed asset tracking easy! Track computers, equipment, furniture, vehicles and other valuable assets on using this comprehensive fixed asset tracking application and LXE's rugged and versatile Marathon Field Computer.

This tested and proven asset tracking solution integrates best asset tracking practices; bar coding, detailed record keeping, and reporting capability into one powerful system. Ideal for businesses and organizations that need to track 500 or more fixed assets, the solution provides a complete fixed asset database, the ability to easily keep asset records up to date, and the ability to streamline the physical inventory process by up to 70%.

Unlike a large laptop, the Marathon's ergonomics allows the user to easily capture important information about each asset including barcode ID, location, department, maintenance, purchasing, warranty, lease, depreciation, IT information, and up to 50 user definable fields using the full QWERTY keyboard and touch screen.

Barcode technology allows you to effectively track moves, add, and changes to the assets within your organization

and also streamlines the physical inventory process significantly. Using the Marathon Field Computer, simply scan the barcode location, scan the assets in that room, and move on to the next room. When finished, you can run a wide variety of reports including unfound assets and asset movements.

RedBeam Asset Tracking is used by all types of organizations, including state, local, and federal government agencies, single site and multi-site companies, and other entities that need to track assets and capital equipment. RedBeam and LXE make it easier than ever to keep asset records up to date. Whether you have 500 or 50,000 assets, RedBeam Asset Tracking is the solution you are looking for!

Key system features include:

- Flexible User Defined Fields
- Intuitive User Friendly Design
- Robust Reporting with Scope and Sort Capabilities
- Purchasing History and Depreciation Calculations
- Import and Export with Microsoft® Excel
- Role-Based User Security
- Robust SQL Database

Benefits *The system is designed to:*

- Speed Up Asset Tracking Process
- Improve Accuracy
- Track IT Related Information
- Monitor Warranty and Lease Expiration
- Maintain Insurance Records
- Comply with Government Regulations
- Meet Audit Requirements
- Improve Depreciation Reporting
- Minimize Paper Work
- Create One Central Asset Repository
- Keep History of Asset Use

Hardware Features

LXE's rugged and versatile Marathon Field Computer gives you the computer power you need for applications such as fixed asset tracking and inventory control in a highly mobile package. Unlike a large laptop, the Marathon's ergonomics allow for easy operation using both the full QWERTY keyboard and touch screen. The Marathon also has an integrated 2MP camera. Powered by the Windows XP or Windows 7 OS, this device gives you the tools needed to streamline tasks, improve productivity, and maximize investment protection.
